

Production Machining

Jerl machine, inc.

Precision, Quality Experience

Jerl has thirty years experience in providing full service metal working and precision machining for a wide variety of industrial and manufacturing customers.

With a focus on lean manufacturing employing modular fixture design concepts Jerl Machine can quickly and efficiently produce parts in an economical manner.

Major machining products include spindles, shafts, gears, pump housings, natural gas cylinders, connecting rods, gear boxes and weldments

Production Capabilities

- * CNC Capabilities
- * Small Batch Repeat & Continuous Flow
- * Part Family – Process Focused

Design & Modular Fixture Concept

- * MasterCAM 10X Solid Modeling
- * Employ Modular Concepts to incorporate accuracy and flexibility
- * Lean Concepts

Inspection Process

- * Quality as part of the process
- * 100% in process inspection
- * State of the art technology
